Our Company

Go Global GIS is an educational training and consulting company based in Baltimore, MD. Our team has extensive knowledge of geospatial software, products, and applications and realizes the growing importance of spatial thinking and broader understanding of technology. We aim to make our training as fun and dynamic as possible!

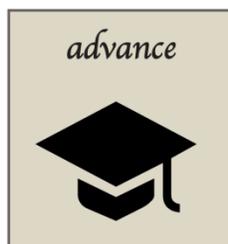

A GIS represents information as layers that can be compared, overlaid, and analyzed to solve problems.

Why GIS Is Important.

Information is no longer limited to spreadsheets and databases. For anyone trying to evaluate information, the most intuitive way is to view it on a map. GIS links geographic information (where things are) with descriptive information (what things are). Unlike a spreadsheet or a flat paper map, GIS allows you to present many layers of different information.

GIS represents features on earth and, unlike any other type of information handling tool, GIS can understand the concept of location.

Featured Courses

Fundamentals of GIS

During this 16-hour course attendees will learn how to visualize geographic data, create maps, query a GIS database, and begin to understand how to solve geographic problems using a systematic approach. Collect field data and learn how to use a database in this hands-on course. Trainings are conducted over 4 days (4 hr classes) or two weekends (8 hr classes). Timing can be modified to meet your needs. \$500.

Chesapeake Bay Summer Program

Field-based research and hands-on training in geospatial technologies are combined to create a transformative learning experience that goes beyond the conventional classroom. 16 hours GIS training and 2 days fieldwork. \$800.

Additional Information

Courses include textbook, 180-day Trial Software CD, and certificate of completion. Students should bring their laptops but arrangements can be made.
